FWC22021 IITH Future Wireless Communication (FWC) ASSIGNMENT

November 3, 2022

Contents

1 problem

Write the Boolean Expression for the result of the Logic Circuit as shown below:

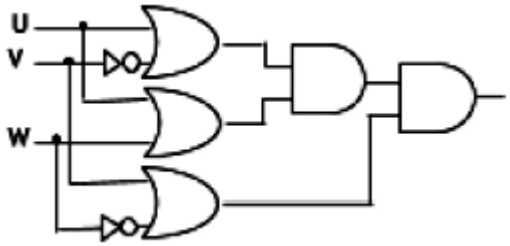

Figure 1: circuit

2 solution

$$F = U(V + !W)$$

3 Components

Components	Values	Quantity
Vaman Board		1
JumperWires	M-F	5
Breadboard		1
USB-C Cable		1
USB-UART		1

4 The steps for implementation:

1. Connect the USB-UART pins to the Vaman ESP32 pins according to Table

VAMAN LC PINS	UART PINS
GND	GND
ENB	ENB
TXD0	RXD
RXD0	TXD
0	IO0
5V	5V

2. Flash the following setup code through USB-UART using laptop

https://github.com/soundaryanaru/FWC_assignments/blob/main/iot/codes/setup/src/main.cpp

```
svn co https://github.com/soundaryanaru/
    FWC_assignments/trunk/iot/codes/setup
cd setup
pio run
pio run -t upload
```

after entering your wifi username and password (in quotes below)

```
#define STASSID "..." // Add your network
    credentials
#define STAPSK "..."
```

in src/main.cpp file

3. You can notice that vaman will be connnected to the network credentials provided above.Connect your laptop to the same network ,You should be able to find the ip address of your vaman-esp on laptop using

```
ifconfig
nmap -sn 192.168.93.1/24
```

where your computer's ip address is the output of ifconfig and given by 192.168.6.x

4. Login to termux-ubuntu on the android device and execute the following commands:

```
proot-distro login debian
cd /data/data/com.termux/files/home/
mkdir iot
svn co https://github.com/soundaryanaru/FWC-
    assignments/trunk/iot/codes/ota
cd codes
```

5. Assuming that the username is Soundarya and password is nithya@123, flash the following code wirelessly

   https://github.com/soundaryanaru/FWC_assignments/blob/main/iot/codes/ota/src/main.cpp

   through

```
pio run
pio run -t nobuild -t upload --upload-port
    ip_addres_of_esp
```

   where you may replace the above ip address with the ip address of your vaman-esp.
